My Final App Idea

App Name:

My app is called StudyBuddy AI It uses artificial intelligence to help students study and understand their schoolwork.

Problem My App Solves:

Many students struggle to understand difficult topics, prepare for tests, and keep track of assignments. My app will help make studying easier by explaining topics in simple words and creating practice questions.

Who Will Use My App:

High school and college students can use StudyBuddy AI. Its especially helpful for students who need extra help studying and organizing their schoolwork.

Why I Chose This Idea:

I chose this idea because studying can be stressful and I wanted to create an app that makes learning easier. I also like that the app could help students improve their understanding and feel more prepared for tests.
